Natural Stone Carpets

Stone Carpets

A Natural Stone Carpet gets its unique decorative character from individual, 2 to 3 millimeter natural river gravel granules. These stones are sourced from river beds throughout Europe and are screened multiple times for size, shape and quality to create a mix that provides a balance for application, aesthetics and maintenance.

The gravel is dyed in over two hundred shades of colour and any colour can be achieved using the RAL system. These stones are then mixed on site with an epoxy resin and are subsequently processed by our Professional floor fitters into a level and seamless floor. We can mix any colour combinations or translate elegant designs from plans into a finished product.

Our Professional floor fitters are trained in-house and are experienced at working within your own home, just like any other tradesmen.

Since the ambient air lodges between the granules of your Natural Stone Carpet, your floor will always feel warm and comfortable.

For example, in a room with a temperature of 20°C, a Natural Stone Carpet will have an average temperature of 14 to 15°C, which is very comfortable.

By installing a Natural Stone Carpet you will combine the appearance and warmth of fabric floor covering with the practical cleaning possibilities of tiles.

With the purchase of a Natural Stone Carpet you will insure yourself with virtually a maintenance free floor.

Properties

- Solvent free
- High non slip properties
- Colourfast
- Excellent heat retention properties
- Compatible with under floor heating
- Low maintenance seamless finish

Colours

- Over 200 standard colours
- 1000's of possible combinations

Thickness

- 6mm – 8mm (depending on grain size)

Applications

- Kitchen / Utility
- Sitting Room
- Dining Room
- Hallway
- Bedroom
- Bathroom
- Virtually any interior situation
